Scheduled Production Break – Summer 2026

Dear Valued Partners,

Hueck Folien is moving forward. As your partner for high-quality solutions in Security, Labeling and Design, we are committed to efficiency, quality and sustainability. An important step on this path is the introduction of a coordinated summer break – a well-established practice in manufacturing industries worldwide.

Our Production Break 2026

From 3rd to 16th August 2026 (calendar weeks 32 and 33), production at our Baumgartenberg facility will be fully suspended. During this period, our availability will be limited. Please take this into account when planning your orders – deliveries affected by this timeframe will be adjusted accordingly.

Why We Are Taking This Step

We use the summer shutdown for comprehensive maintenance and servicing of our coating and metallisation equipment. For the remaining 50 weeks of the year, we operate at full capacity with well-coordinated teams – enabling us to provide even more reliable delivery schedules and faster order confirmations.

At the same time, the summer shutdown represents an active contribution to sustainability: by shutting down our heat generation for the drying processes, we significantly reduce our energy consumption during this period. As an ISO 14001-certified company, this is a consistent step for us.

Your Planning

For time-critical projects, we recommend factoring the summer break into your order planning. Our sales team is of course available to work with you on finding the optimal solution for your requirements. For urgent matters during the production break, you can reach us by email at office@hueck-folien.com – we will respond promptly once operations resume.

Thank you for your continued trust in Hueck Folien. We look forward to our ongoing partnership.

With kind regards

Christoph Steger
