## Our passion: the world of films

HUECK FOLIEN is a coating specialist for optically demanding, functional film coatings and high security. In our core markets SECURITY, LABELING and DESIGN, we from HUECK FOLIEN give unmistakable identity to our customers' products. HUECK FOLIEN has been lending identity to the products of its customers since 1970. Initially with flexible packaging and tear tapes and then over time, increasingly with products possessing a more extensive range of

functions. The experience thus gathered with regard to the coating of web materials together with the in-house developed, top technologies, form the basis of our current success and have made the company a coating specialist that is in worldwide demand. Since 1970 the independent, family-owned company has concentrated upon the development and production of high security features for banknotes and documents as well as on film coatings for technical applications.

## Absolute homogenous and monochrome

A speciality! The still, smooth surface of a mountain lake shows us flawless design. But emulating such natural beauty poses a major technical challenge. We meet this challenge with films that precisely meet customer requirements. For us, multicolour motif printing is also natural, and our clients can apply these films on various base materials such as steel, textiles,

wood, plastics, paper and nonwovens. Our design films not only offer perfect surfaces, but also superior functionality such as extreme scratch resistance and resistance to chemical and physical influences. They include special, easy-to-clean and anti-viral finishes or touch-sensitive buttons and are also available in formable and back-filling variations.

# VISCORA® Steel

Combines the look of metal with the flexible functionality of films

## Key facts

- ★ Long term experience in coating PET- films
- ★ Width up to 1.620 mm
- ★ Customized solutions
- ★ Clean-room area
- ★ Easy process handling

We make every wish come true:  
let your imagination run free –  
we accept the challenge!

## Key advantages of VISCORA® Steel:

- Perfect scratch resistant surface
- Easy-to-clean surface: less fingerprints visible
- High chemical resistance

scratch resistant

anti-fingerprint

chemical resistant

soft touch

lamination

With our  
VISCORA® films  
we raise the bar of  
current design desires.
