

# ADHESION PROMOTERS FOR SELF-ADHESIVE MATERIALS

HUECK FOLIEN offers a specially developed primer that significantly improves the anchorage of various adhesives (removable or permanent) on a wide range of substrates. The coated facestock of HUECK FOLIEN is typically used in critical applications to avoid an undesired adhesive transfer (e.g. adhesive tapes).

## CHARACTERISTICS:

- Available on wide range of substrates (PET, PE & OPP films or AL foils)
- Thickness range: 8 – 250 µm (0.315 – 9.84 mil)
- Available in combination with metallized films
- Coating in full area or in pattern possible
- Clear optical appearance
- Ecofriendly product due to low VOC
- Maximum width: 2.200 mm (86.61 ")

## KEY ADVANTAGES:

- Significant improved adhesive anchorage through HUECK FOLIEN's primer
- Low coating weight for minimal impact on final product construction
- 2-sided application of adhesion promoters possible
- Alternative to TCA treated films
- Equal performance even on recycled base films
- Adhesion promoters can be used in combination with other functional / optical coatings

**For detailed information of our adhesion promoters,
