

VOID TAMPER EVIDENT FILMS

The printable security facestock film with tamper evident pattern is available on a wide range of base materials. The VOID feature provides basic security for labels. On request, the VOID pattern can be customized. Security can be further enhanced by UV fluorescence or machine-readable taggants. Several release coatings guarantee optimum performance with almost any adhesive and on any substrate. The optional micro VOID feature is especially designed for small labels and is harder to counterfeit than standard VOID patterns.

CHARACTERISTICS:

- Products available on PET, PP, PE, rigid PVC and paper
- Combination of VOID with hologram is possible
- Maximum width: 1,600 mm (63 "), Holographic VOID: 810 mm (31.89 ")
- Design options: white, clear, metallic colours, gold and more metal colours, VOID text, checkerboard, micro text, custom colours and patterns
- Surface finish: high-gloss, glossy, matt, supermatt, customised finishes
- Additional features: UV fluorescence, machine-readable taggants, dry peel effect
- Topcoat printability: flexo, screen, offset with UV- and solvent-based inks, thermal transfer, HP indigo, UV-inkjet, desktop laser-printer, Xeikon

KEY ADVANTAGES:

- Once the film is tampered with, a message appears
- Combination with topcoat for various printing methods possible
- Customised design options are possible
- A built-in dry-peel effect is available which prevents counterfeiters from replacing the removed film and provides additional security
- OurVOID products can be used even on delicate substrates like paper or cardboard
